## Career Profile

I am a painter with over a year of experience painting residential and commercial buildings.

I also have 9 years of experience in manufacturing as a CNC machine operator and CNC programmer. I have been in both a job shop environment and a production plant with an output as high as 8000 parts per day. As a programmer, I have conceptualized and implemented 20+ production programs.

## Career Highlights and Achievements

As a CNC programmer working closely with tool vendors and giving up to date job instructions to operators, I have saved over \$4.00 in tooling cost per part and reduced scrap rate by 7%. I have also updated programs and have reduced cycle times up to 50%.

## Experience

### **PINON PAINTING**

Painting Company

#### Painter – August 2020 to Present
